PERSONAL PROFILE

A budding engineer with a strong foundation in programming - data structures and algorithms, experienced in academic projects. While pursuing my bachelors in engineering, as a scholar I welcome challenges from other domains this vast field has to offer. I am looking to gain industry exposure in technical positions.

PROJECTS

- **Global Airlines System** - Advanced data structure algorithms used to implement International Airline Management operations and various tasks efficiently.
- **Note Taking App** - Made a web application which uses state and stateless components of react to make an interactive note taking app.
- **Match-Making App for pets** - An application which uses basics of HTML and different classes of bootstrap to make a web page which functions like tinder for dogs.
- **Restaurant Dine-In Software (Ongoing)** - A single platform that helps the customer to place dine-in orders, call for assistance and make secure payments.

EDUCATIONAL HISTORY

PES University

Bachelors in Technology - CSE | July 2020 - July 2024

High School

Science Graduate | June 2011 - July 2020

- Gyan Bharti Senior Secondary School (2018 - 2020) - 88.6%
- Creane Memorial High School (2006 - 2018) - 94.6%

SKILLS

- Python, C
- Data Structure and Algorithms
- React , NodeJS
- HTML , CSS
- Numpy and Pandas

COURSES

- The Complete 2022 Web Development Bootcamp instructed by Dr. Angela Yu
- Machine Learning offered by Stanford
- IBM Data Science Professional Certificate
